### **HEALTH AND SAFETY POLICY OF CONSTAB MIDDLE EAST POLYMER A.Ş.**

It is the policy of the Management of Constab Middle East that all employees and visitors work in a safe environment.

Observing the following rules will help reduce the potential for accidents.

Take great care when working near the extruders. They operate at high temperatures and will burn the skin if touched.

Molten material leaving the extruders is hot. Do not touch directly without protective gloves.

Pelletizers & grinders have sharp-edged blades. Do not handle them without adequate training and supervision.

Use personal safety equipment as directed by your supervisor (this includes face mask, visor, gloves, ear defenders etc).

Take great care when working on the mezzanine floors.

Take great care when on the mezzanine floors.

Some liquid ingredients are heated prior to compounding. Take care when handling the hot metal drums and when in the vicinity of the heated liquid.

All spillage of pellets and other materials must be swept up IMMEDIATELY.

Do not run in the factory

Keep all the doors shut at all times

Beware of the fork lift truck which may move at any time. Never stand on the forks or allow yourself to be lifted by the machine or to ride on it unless you are a qualified driver.

Observe electrical safety at all times. Do not attempt to repair or modify any electrical equipment unless you are trained and qualified.

Observe the no smoking rules. If you smoke, do so only in the permitted areas.

Always lift items using the correct method as explained by your supervisor.
